PROFESSIONAL SUMMARY

Unity Developer with experience in building interactive AR/VR applications, gameplay prototypes, immersive 3D environments, and real-time interaction systems. Skilled in Unity 2D/3D, C#, gameplay mechanics, UI systems, camera controls, animation workflows, and Blender-to-Unity pipelines. Experienced in developing optimized and user-focused interactive experiences for education, visualization, and gameplay-oriented applications.

PROFESSIONAL EXPERIENCE

System Analyst (AR/VR) & 3D Team Lead, IEMA Research and Development Pvt. Ltd.	03/2025 – Present Kolkata
- Developed Unity-based AR/VR applications and interactive 3D systems using C# and Unity. - Designed gameplay-oriented interaction systems, camera controls, UI workflows, and animation systems. - Optimized 3D assets and real-time environments for smooth performance across devices. - Managed Blender-to-Unity asset integration pipelines and improved workflow efficiency. - Worked on immersive applications including LabReality and VisualizerXR. - Collaborated with developers and designers to deliver polished user-focused experiences. - Received a Pre-Placement Offer (PPO) based on strong technical contribution and project performance.	

EDUCATION

B.Tech in Computer Science & Technology, UEMK	2021 – 2025
Higher Secondary (Science), R.P.S. College, Bihar	2019 – 2021
Secondary School, St. Paul's English School, Bihar	2018 – 2019

TECHNICAL SKILLS

Programming

- C#
- Unity Scripting

AR/VR

- AR Foundation
- Vuforia

Version Control

- Git
- GitHub
- Git LFS

Other

- Optimization
- Interactive Systems
- Real-Time 3D Pipelines

Game Development

- Unity 2D/3D
- Gameplay Mechanics
- UI Systems
- Camera Systems
- Animation Systems

3D Tools

- Blender
- SketchUp

Design Tools

- Figma
- Canva

TECHNICAL PROJECTS

Color Tower [🔗](#)

Developed a Unity-based casual puzzle game focused on responsive gameplay mechanics, object interaction, level progression, and smooth player experience. Implemented gameplay logic, interaction systems, UI elements, and game flow management using C# and Unity.

Clash Bowl [🔗](#)

Developed a Unity-based gameplay prototype focused on smooth gameplay mechanics, responsive controls, immersive interaction, and real-time player feedback systems.

National Postal Museum (NPM)

Designed and implemented an interactive AR experience using marker-based tracking and immersive exhibit visualization in Unity.

VisualizerXR [🔗](#)

Built interactive AR modules for educational visualization using Unity and Blender, featuring real-time interaction systems and immersive learning experiences.

LabReality App [🔗](#)

Contributed to immersive AR science simulations with interactive experiments, UI systems, and optimized 3D environments.

Interactive Museum Experience

Designed immersive 3D interaction concepts, exhibit navigation systems, cinematic camera flows, and gameplay-oriented user experiences in Unity.
